

Delphi Harsh Environment Series (HES) Connection Systems

The Delphi Harsh Environment Series (HES) Connection Systems include circular connectors, terminals, and a rectangular 50 and 60 way header. The 24 shell size industry standard connector includes six terminal configurations (47, 31, 29, 23, 21, and 19) and is offered with and without backshells. Delphi's circular connection systems are available with straight and right angle conduit wire dress covers on both receptacle and plug assemblies.

The HES Connection Systems provide higher current capability, improved sealing, higher terminal retention and a significant cost advantage compared to standard pin-and-sleeve systems. Delphi HES Connection Systems are also compatible with existing systems in the commercial and agricultural vehicle markets.

► Benefits

- **Terminals**
 - High current performance is realized through the selection of high conductive materials
 - Robust design with a stainless steel sleeve that provides stability and protection to contact interface area
 - Overlapping wing design provides exceptional strain relief and larger outside diameter cable range capability
 - Crimp stability over the terminal life with the use of tin in the crimp area
 - Wide range of cable sizes accommodated with Delphi's crimp design
 - Interchangeability with industry standard terminal products
- **HES Circular Connectors**
 - Sealing performance exceeds expectations with recessed 3-rib design that will maintain sealing properties even if a tight wire dress is applied, providing better sealing capability up to 30% compared to existing designs
 - Superior contact (terminal) retention performance virtually eliminates terminal unseats with a specialized finger design that results in better retention up to 40% when compared to existing designs
 - Interchangeability with industry standard circular products
 - Ergonomic design for ease of assembly and to maintain quality:
 - Arrows help simplify pre-engagement of locking nut for simplified mating
 - Visual lock engagement window
 - Color coded seals to distinguish between various cable diameters as well as terminal gender
 - Low torque engage

HES Connection Systems

HES Terminals

HES Circular Connectors

- Robust construction through sonic welding the seal retainer construction and using wave spring design that ensures the connection system maintains face seal compression, even when subjected to the high vibration commercial vehicle SAE J-2030 standard

HES Header System

- **Header System**

- Virtually eliminates unseats with Delphi's two stage terminal retainer design
- High vibration design passes 29 Grms vibration specification
- Chemical resistant header face seals with the use of flourosilicone
- Built-in probing window protect the female terminal during the build process
- Over-torque bolt design protects the header when too much torque is applied
- True pin position is one of the tightest in the industry at 0.225 mm, ensuring easy mounting to a circuit board
- Interchangeability with industry standard products

► **Typical Applications**

Delphi Harsh Environment Series products are suited for the following industries:

- Agriculture
- Commercial vehicle
- Construction
- Marine
- Other harsh environment applications

The HES circular design is ideally suited for making connections in a vehicle sheet metal firewall pass-through locations. Because of the rugged connection system design, they are well suited for engine compartments. HES headers are an ideal choice for high density device I/Os that are mounted directly to the engine.

► **Specifications for Connectors and Terminals**

Contacts	Size 20 (1.0 mm) Size 16 (1.6 mm) Size 12 (2.4 mm)
Application Tooling	Delphi tooling available for each current configuration
Sealing Plugs	Size 20 and 16 Size 12
Operating Temperature	- 55°C to + 125°C
Durability	No electrical or mechanical defects after 100 cycles of engagement or disengagement (1000 cycles for the diagnostic connector)
Physical Shock	Withstands 50 Gs of mechanical shock in three axes without mechanical failure
Vibration	Sinusoidal vibration of 20 GRMS and random vibration of 12.4 GRMS without physical damage or loss of continuity
Sealing Capability	IP67 rating Withstands high pressure spray of 375 cycles of 1020 psi @ 150 gal/hr. Withstands water submersion of 3 feet without water intrusion

Cable Range for Optimal Sealing	Contact size: Blue Seal: Orange Seal: Size 20 (1.0) 1.10 - 2.40 mm ² 1.80 - 3.05 mm ² Size 15 (1.6) 1.30 - 2.85 mm ² 2.25 - 3.70 mm ² Size 12 (2.4) 2.45 - 3.60 mm ² 2.90 - 4.30 mm ²
Corrosion Resistance	No corrosion after exposure to 100 hrs of salt fog
Electrical	
Contact Current Rating	Contact Size: Max. Current (Amps): Size 20 18 Size 16 28 Size 12 40
Contact Resistance	10 mΩ for cable ≤ 18 Ga. 6.7 mΩ for cable > 16 Ga.
Dielectric Withstanding Voltage	1000 V AC
Insulation Resistance	Greater than 20 MΩ
Mechanical	
Contact Retention to Housing	Contact Size: Retention Force: Size 20 160 N Size 16 270 N Size 12 365 N
Mating Torque	Less than 4 Nm
Un-mating Torque	Less than 4 Nm
Physical	
Housing	Glass filled nylon
Seals	Silicone
Contact	Copper alloy
Female Terminal Hood	Stainless steel
Plating	Nickel and gold with tin in crimp area

► **Miscellaneous Accessories**

Part Number	Description
13780240	Gasket
13813956	Gasket with adhesive
13752446	Shipping cover (reverse pin cover)
13668988	Shipping cover (standard pin cover)
15417623	Nut
13840220	Lock washer

HES plugs

► **Specifications for the 50/60 Way Header Connections**

Contacts	Size 20 (1.0 mm)
Sealing Plugs	Size 20 (Note: Different part number than HES circulars)
Operating Temperature	- 55°C to + 125°C
Physical Shock	Withstands 50 Gs of mechanical shock in three axes without mechanical failure
Vibration	29.4 Grms
Sealing Capability	IPX7
Corrosion Resistance	No corrosion after exposure to 100 hours of salt fog Chemical resistant flourosilicon face seal on the header
Electrical	
Contact Current Rating	Size 20: 18 amps maximum current
Contact Plating	Selective gold with tin in crimp area on the female contact Gold flash palladium on the header pins
Mechanical	
Contact Retention to Housing	Contact size: Retention force: Size 20 90 N
Physical	
Housing	High temperature, glass filled nylon
Seals	Flourosilicone face seals Silicone cable seals
Contact	Copper alloy
Plating	Female: Gold with tin in crimp area Male: Gold flash palladium

► **The Delphi Advantage**

Delphi is one of the world's leading automotive suppliers of advanced terminals, connectors, sealing, wiring and cable products. Delphi's deep understanding of various connection system technologies and the company's vast research and development capabilities have enabled continuing innovation.

Delphi is a source for high value solutions and our expertise is built into every product. Delphi has a thorough understanding of markets around the world and a global network of resources. Delphi relies on its global capabilities, consistent processes, and extensive testing to develop and manufacture a comprehensive offering of terminals, connectors, sealing, wiring and cable products. The result is that Delphi provides customers with robust, reliable products and world-class quality.
